

Cecily L. Betz

Worldwide Successful Pediatric Nurse-Led Models of Care

- Offers a compilation of nurse-led/nurse-directed models of care for infants/children/adolescents
- Provides innovative models of care that can be implemented in other health settings
- International perspective successful exemplars from less developed countries and underserved populations

This book provides readers with international exemplars of nurse-led/nurse-directed pediatric models of care. It offers innovative and forward-thinking models of nursing care, incentives and opportunities for nurses to replicate similar nurse-led models of care in their own clinical and community-based settings. Readers will benefit from selected and proven nurse-led/nurse-directed pediatric models of care that have been developed, implemented and evaluated by advanced practice pediatric nurses, including successful exemplars from less developed countries and underserved populations. This book is a welcome addition to faculty in child health graduate programs and/or clinicians in hospitals to have this kind of "model" for practice. This book encompasses an extensive compilation of contributions of international authors, also from countries that have been rarely featured in books, and it facilitates worldwide linkages with colleagues internationally.
